## **Project Files List**

To complete many of the lessons and practice exercises in this book, students need to use a Project File that is supplied by Course Technology and stored on a Project Disk. Below is a list of the files that are supplied, and the unit or practice exercise to which the files correspond. For information on how to obtain Project Files, please see the inside cover of this book. The following list only includes Project Files that are supplied; it does not include the files students create from scratch or the files students create by revising the supplied files.
